Author index

Bocian, D.F., see Schick, G.A. (895) 127

Caplan, S.R. and Pietrobon, D.
Theoretical analysis of double-titration experiments (895) 241

Christou, G. and Vincent, J.B.
The molecular 'double-pivot' mechanism for water oxidation (895) 259

Cogdell, R.J. and Frank, H.A.
How carotenoids function in photosynthetic bacteria (895) 63

Daut, J.
The living cell as an energy-transducing machine. A minimal model of myocardial metabolism (895) 41

De Vries, S. and Marres, C.A.M.
The mitochondrial respiratory chain of yeast. Structure and biosynthesis and the role in cellular metabolism (895) 205

Diner, B.A. and Petrouleas, V.
Q_{400}, the non-heme iron of the Photosystem II iron-quinone complex. A spectroscopic probe of quinone and inhibitor binding to the reaction center (895) 107

Divan, J.J.
Mitochondrial transport of K^+ and Mg^{2+} (895) 155

Frank, H.A., see Cogdell, R.J. (895) 63

Golbeck, J.H.
Structure, function and organization of the Photosystem I reaction center complex (895) 167

Hatch, M.D.
C_4 photosynthesis: a unique blend of modified biochemistry, anatomy and ultrastructure (895) 81

Krab, K. and Wikström, M.
Principles of coupling between electron transfer and proton translocation with special reference to proton-translocation mechanisms in cytochrome oxidase (895) 25

Marres, C.A.M., see De Vries, S. (895) 205

Nichols, W.W.
On the mechanism of translocation of dihydrostreptomycin across the bacterial cytoplasmic membrane (895) 11

Petrouleas, V., see Diner, B.A. (895) 107

Pietrobon, D., see Caplan, S.R. (895) 241

Schick, G.A. and Bocian, D.F.
Resonance Raman studies of hydroporphyrins and chlorophylls (895) 127

Schneider, D.L.
The proton pump ATPase of lysosomes and related organelles of the vacuolar apparatus (895) 1

Vincent, J.B., see Christou, G. (895) 259

Wikström, M., see Krab, K. (895) 25
